## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1, drawn to a nucleotide sequence of a growth-related gene as set forth in SEQ ID NO: 1, classified in class 536, subclass 23.1.
  - II. Claim 2, drawn to nucleotide sequence of a growth-related gene as set forth in SEQ ID NO: 2, classified in class 536, subclass 23.1.
  - III. Claim 3, drawn to nucleotide sequence of a growth-related gene as set forth in SEQ ID NO: 3, classified in class 536, subclass 23.1.
  - IV. Claim 4, drawn to nucleotide sequence of a growth-related gene as set forth in SEQ ID NO: 4, classified in class 536, subclass 23.1.
  - V. Claim 5, drawn to nucleotide sequence of a growth-related gene as set forth in SEQ ID NO: 5, classified in class 536, subclass 23.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are nucleotide sequences that have no apparent relationship except that they were each isolated in the same screening procedure and are recited to be growth related. Each sequence requires a separate search and non-coextensive consideration of all aspects of patentability. Absent evidence to the contrary, each sequence is presumed to represent an independent and distinct invention.

Art Unit: 1647

3. Because these inventions are distinct for the reasons given above, and the search required for any of Group I-V is not required for any other of Group I-V, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

5. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
